**CENTENARY EARLY LEARNING CENTER
ACADEMIC ENRICHMENT PROGRAMS
FALL 2020/ SESSION ONE**

Miss Lisa (formerly of The ART of Learning Studio) will continue teaching in-person academic enrichment programs at Centenary Early Learning Center, 200 Hillside Avenue, Metuchen. In case of school closure, Virtual Classes will be offered. **Session one will begin on November 9th**

READING EXPLORERS 1 (AGES 4-5)

Will develop reading readiness skills, letter sounds, handwriting, sight words and sentence structure.

When: Mondays, 1:00-2:30pm • **Fee:** \$285 (9 weeks)

Classes are in person. Review our health and safety policy [HERE](#).

MATH EXPLORERS (AGES 4-5)

Will learn set theory, classification, numerical operations (adding/subtracting), measuring, graphing, currency, time and spatial relationships.

When: Wednesdays, 1:00-2:30pm • **Fee:** \$245 (9 weeks)

Classes are in person. Review our health and safety policy [HERE](#).

READING EXPLORERS 1 Ages 4 (by October 1) – 5

When: Mondays, 1:00-2:30pm • **Fee:** \$285 (9-week session)

Session Dates: 11/9, 11/16, 11/23, 11/30, 12/7, 12/14, 12/21, 1/4, 1/11

The first of this trimester in-person program, meets once a week and specifically teaches reading readiness skills. The children will review letter sounds and begin to explore long and short vowel sounds and their use in the English language. Students will also learn to properly print letter symbols using correct pencil grip and good posture. Throughout the three trimesters, annual program sight words and sentence structure will be explored using Workbook A and 12 primers of the Handprints early reading program. Support work will be given for home use.

MATH EXPLORERS Ages 4 (by October 1) – 5

When: Wednesdays, 1:00-2:30pm • **Fee:** \$245 (9-week session)

Session Dates: 11/11, 11/18, 11/25, 12/2, 12/9, 12/16, 12/23, 1/6, 1/13

The first of this trimester in-person program meets once a week and specifically focuses on math skills. The students will be exposed to various mathematical concepts including set theory, classification and numerical operations (addition and subtraction). Number lines, number charts and Venn diagrams will be used to explore values and equations. Measuring, graphing, skip counting, American money values, time (analog and digital) and spatial relationships will be discovered in a hands-on, fun environment. Support work will be given for home use.
